

On September 11, 2009 start the pilot working group on energy of secondary schools of the Provinces of Vicenza and Padova. The group has been organised, within the framework of the EGS project, by Centro Produttività Veneto (CPV) and Sogesca s.r.l. As a first meeting, the participating schools have discussed a set of best practices on energy education proposed by the EGS project partners that will be now integrated with proposals from the group. The next meeting will take place in Schio, on 7 October, in occasion of a 3-day event that will see the launch of the 1st Local Energy Forum of schools of the Municipality of Schio.
