

ROC Nijmegen is a Regional Educational Centre. It offers students, both young and mature, courses in secondary vocational education and in adult education. In addition it provides contract teaching for companies and institutions. Approximately 12,000 students are enrolled at ROC Nijmegen. The centre has over 1,100 staff. The Netherlands has scores of ROCs. Some 40% of the inhabitants of the Netherlands are following or have followed a course at a ROC.

Focus

ROC Nijmegen educates young people and adults for a career. As far as possible we do this in cooperation with business. In this way the student receives a practical grounding which is a good preparation for a future job.

Nijmegen and surrounding areas

ROC Nijmegen consists of different sectors, each of which provides different, related courses. In addition it has a branch in Boxmeer, MBO College de Maasvallei, and one in Druten, MBO College Land van Maas en Waal. There are also regional locations concerned solely with adult education.

Energy usage

In the picture you can see the new building for the departments of Economical Studies and for studies in Health and Welfare. In this building the newest technology for climate control has been implemented. There is a closed water circuit which is partly stored in a basin some 30 meters into the ground and is partly used for climate control. During summer the part with cooled water is used for cooling the building and in wintertime hot water is pumped up for heating the building.
